Looks like a really funny game. But at the moment it's unplayable for me. The controls have a delay from 3sec and some orders couldn't be executed. pro: + playstyle looks very interesting + price + dedicated developer con: - game controls are horrible - menu controls, same like game controls - troops and commander get stuck by some obstacles Update: Since the last update from today the controls (+A/D, -W/S) get better but it's still unplayable.. A Promiseing Game Just Requires More Polish.. WoW Great RTS game, Broforce meets BattleForge in WW2 Setting. I really like the idea here to combine a 2D Arcade Shooter with Card Game Elements, combination is indeed in same time interesting, fresh, old School and original.. A Promiseing Game Just Requires More Polish.
