HEY KIDS! IT'S ANOTHER u2665u2665u2665u2665ING MINEZ FLIP!!!!!! I seriously only bought this game so I could downvote it and refund it. u2665u2665u2665u2665 you, whoever you are that put this unaltered asset package on steam for the 90 millionth time. You're not a game developer, you're a worthless, immoral, toxic scam artist.. .You take just a couple steps or just turn around and out of nowhere, a few feet in front of you, a zombie appears and attacks without hesitation. And that's pretty much the whole game, zombies appearing out of nowhere from anywhere and attacking instantly. If you happen to survive long enough to go inside a building then the zombies with the space inside the building to spawn will, and attack but the rest of the zombies will spawn outside the building's walls in numbers equally the time you've spent inside waiting to swam on you when you exit the building.. You're not a game developer, you're a worthless, immoral, toxic scam artist.. I bought it thinking it'd be a fun survival horror game with crafting and base building. Instead, the game is about surviving for 30 seconds and respawning to do it again. If you get lucky and don't meet any zombies for a while, you might scrounge up some useless stuff, but you won't survive long enough to gather enough to make anything useful. If you enjoy a minecraft graphics ripoff, dying every minute or two before you can build or craft anything cool, and not talking to anyone in-game, then this is the game for you. For everyone else, this game will be like pulling out your fingernails one at a time. If they fixed it so that players could survive long enough to gather and craft and build, then it could be decent for the price.. Somehow, it's soo laggy on my 6Gb RAM that I have about 1 frame per sec. It's not so bad when I look down to my feet. Whenever I look up to about horizon and over, I get huge lag spikes and no fps. Seems like an interesting concept, low price and all. I'll be trying it again in some time I guess.. Somehow, it's soo laggy on my 6Gb RAM that I have about 1 frame per sec.
